

ISMAIL AHMAD GBOLAHAN

Software Developer(Back-End Focus)

ahmadgbolly97@gmail.com <https://github.com/SneezyG> <https://www.linkedin.com/in/ahmad-ismail-4161b32a3>

SUMMARY

I'm a software developer skilled in back-end engineering, web development, project management, and user interface design. I work with agile methodologies, scalable architectures, cloud infrastructures and microservices patterns to deliver secure and high-performance applications. I'm a problem-solver who works well with others, shares ideas openly, and brings a positive, team-focused attitude to every project.

EXPERIENCE

Development Team Lead

Pristine Education LLC

📅 Present 📍 Remote, Nigeria

Leading an early-stage EdTech startup in building its first MVP

- Lead cross-functional teams to design and develop a scalable, cloud-native learning platform
- Established Agile development processes, accelerating MVP delivery and iteration cycles.
- Oversaw code quality, API architecture, and deployment pipelines to ensure maintainability and scalability.

Back End Engineer

TBC Solutions(Self Employed)

📅 07/2022 12/2024 📍 Remote, Nigeria

Built powerful, scalable and secure backend systems.

- Developed and deployed APIs for web and mobile platforms, reducing integration time by 20%
- Optimized database queries and back-end logic, improving application performance by 25%
- Collaborated with cross-functional teams to deliver tailored back-end solutions, contributing to a 15% increase in client retention.

Software Developer & IT Specialist

Shieldgate Security Technology

📅 04/2020 06/2022 📍 Lagos, Nigeria

Drove Security-Focused Technology and IT Improvements

- Designed, developed, and maintained company website, increasing online inquiries by 40%.
- Integrated service request forms and customer portals, streamlining scheduling and operations.
- Provided IT support for web, software, and hardware systems, ensuring high availability and minimal downtime.

CERTIFICATIONS

ApplicationDevelopmentusing Microservices and Serverless

IBM, offered through Coursera

Software Containerization with Docker, Kubernetes & OpenShift

IBM, offered through Coursera

EDUCATION

Bachelor'sdegree of Technology

Federal University of Technology, Akure

📅 10/2015 03/2020 📍 Akure, Nigeria

SKILLS

Specialization

Back-End Engineering, API Development, Project Management, Web Development, Interface Design

Tools & Framework

Python, Java, JavaScript, PHP, SQL, HTML, CSS, Django, Node.js, FastAPI, Spring Boot, Laravel, Express, REST API, GraphQL, Docker, Kubernetes, AWS, Figma, Git, Fastify

Competencies

Microservices, Web3, LLM, Agile/Scrum, Serverless, Cloud-Native, UI/UX Design, Version Control, CI/CD Pipelines, Containerization, Test-Driven Development, Database Optimization

PROJECTS

BookChain-Building for scalability

🔗 <https://bit.ly/3F2iqhd>

A distributed microservice based library management system designed using service oriented architecture

Guardians - A Safety Management System

🔗 <https://bit.ly/43pClzO>

A Safety platform for large industrial sites, enabling instant alerts, zone-based location tracking, and multi-channel notification

Culture - A User Interface Design

🔗 <https://bit.ly/3GoXQrP>

An intuitive UI design for a safety platform promoting a culture of prevention and preparedness for industrial hazards

VOLUNTEERING

Backend as a Service

Delivered 10 volunteer BaaS projects for startups and non-profits, enabling scalable product launches at minimal cost.
